

Map of the US requirements

Name _____

✂ Step 1: Number every state in pen (if you screw up just get some white out)

Step 2: On a separate piece of paper (separate because you can quiz yourself with this number copy as you will have an answer key to go with it) write out the state name that goes with the number

Step 3: Shade state boundaries so that no two states that touch are the same color

Step 4: Add 3 points of interest to you on the map and create a key to go with it

For me these would be some points of interest I would use:

B=I would put a B over San Diego, California because I was born there

=I would put a football over Seattle because the Seahawks are my favorite pro team

= I would put the Oregon Duck over Eugene because he is my favorite mascot

=I would put a compass over Barrow, Alaska because that's the farthest North I've been.

You get the idea. Tell me 10 interesting things about you—try to make them different (don't do 10 football teams) 😊 Yes, you can use clip art and paste it on later, but be sure it is small enough that it doesn't block the whole state. Otherwise, just put a handwritten symbol.

Step 5—Good work, you are done! Turn in your finished product with your name and prepare for your test. 😊

Name: _____
